HAGZZ / ACADEMY GUIDE

Big-stage thinking. Everyday clarity.

For academy owners and operations teams in Qatar

Maracanã, Rio de Janeiro, Brazil · Martin Aarflot / Unsplash · International sporting context; no affiliation implied.

A confident academy experience starts with the details: a clear schedule, an accurate player record, a traceable payment and a guardian who knows where to turn.

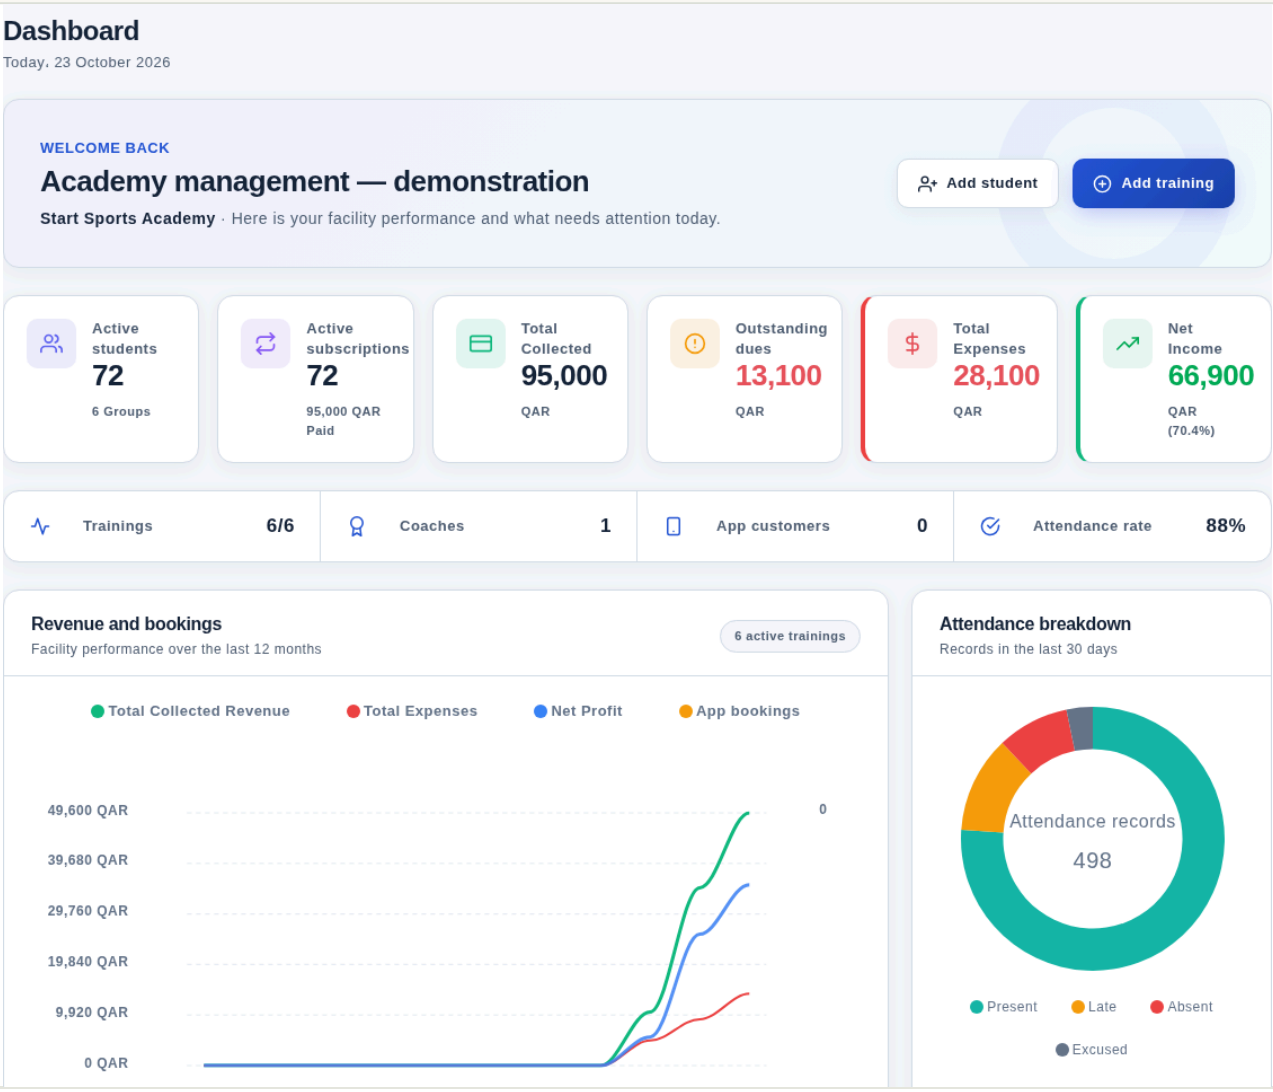

Hagzz brings these operating steps into a connected workflow. This guide shows the management questions behind the dashboard, then the practical steps your team can follow.

Clear ownership Visible activity Documented follow-up

HAGZZ / ACADEMY GUIDE

What needs your attention today?

The owner’s view: connect each number to a next action.

Actual Hagzz interface. Local demonstration records; not customer results.

Three priorities, one starting point.

Operations: 72 active players across six groups.
Follow-up: 88% attendance across recorded session cases.
Collection: QAR 13,100 remains outstanding.

All dashboard figures are illustrative records entered into a local demonstration academy, through 23 October 2026. They are not actual client results. Cards show cumulative totals; individual charts have different time scopes.

HAGZZ / ACADEMY GUIDE

Does activity turn into collection?

Financial performance / read the month before making commitments.

49,600
QAR collected in October

14,100
QAR October expenses

35,500
QAR recorded cash difference

Native dashboard; illustrative data. Twelve-month view with August–October records. Cash difference is not audited accounting profit.

THE MANAGEMENT QUESTION

What did we collect—and what did we spend?

Through 23 October, the recorded cash difference is QAR 35,500. The chart places this month beside the preceding months.

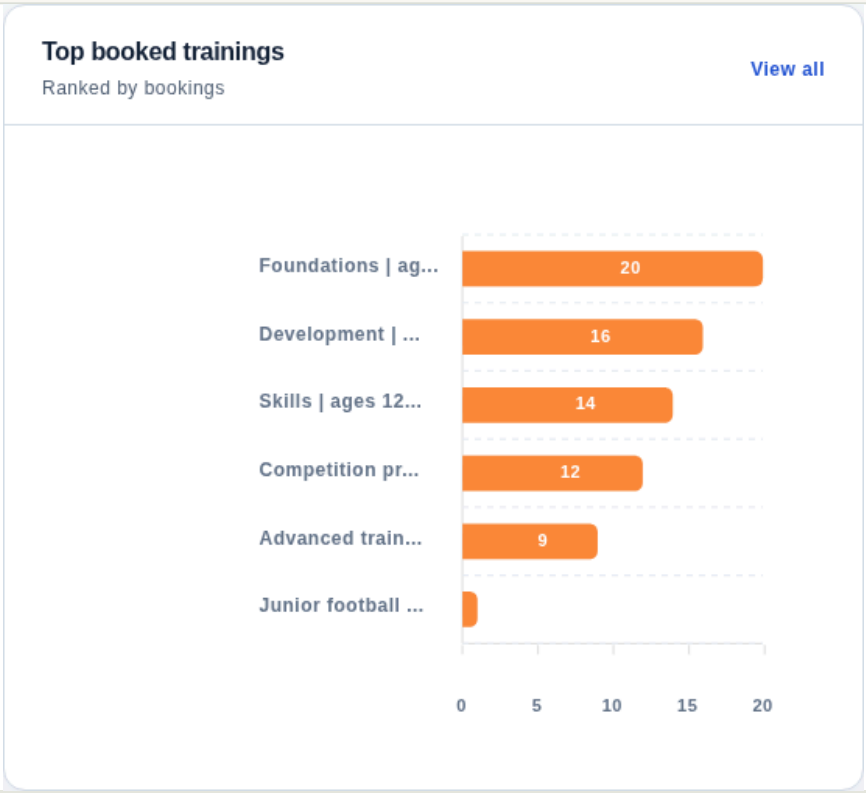

Next action: Review the reason for changes before adding a new group or operating commitment.

HAGZZ / ACADEMY GUIDE

Where is demand concentrated?

Registration and programmes / the active group mix.

72	6	20
Active subscriptions	Active groups	Subscriptions in the leading group

Native chart, illustrative records. Current active subscriptions—not new registrations in October.

THE MANAGEMENT QUESTION

Which group needs a capacity review?

The largest group has 20 active subscriptions; the advanced group has nine. In this example, the chart uses group subscriptions, despite its general booking title.

Next action: Check coach availability, capacity and timing before expanding. Compare like-for-like age and ability groups.

HAGZZ / ACADEMY GUIDE

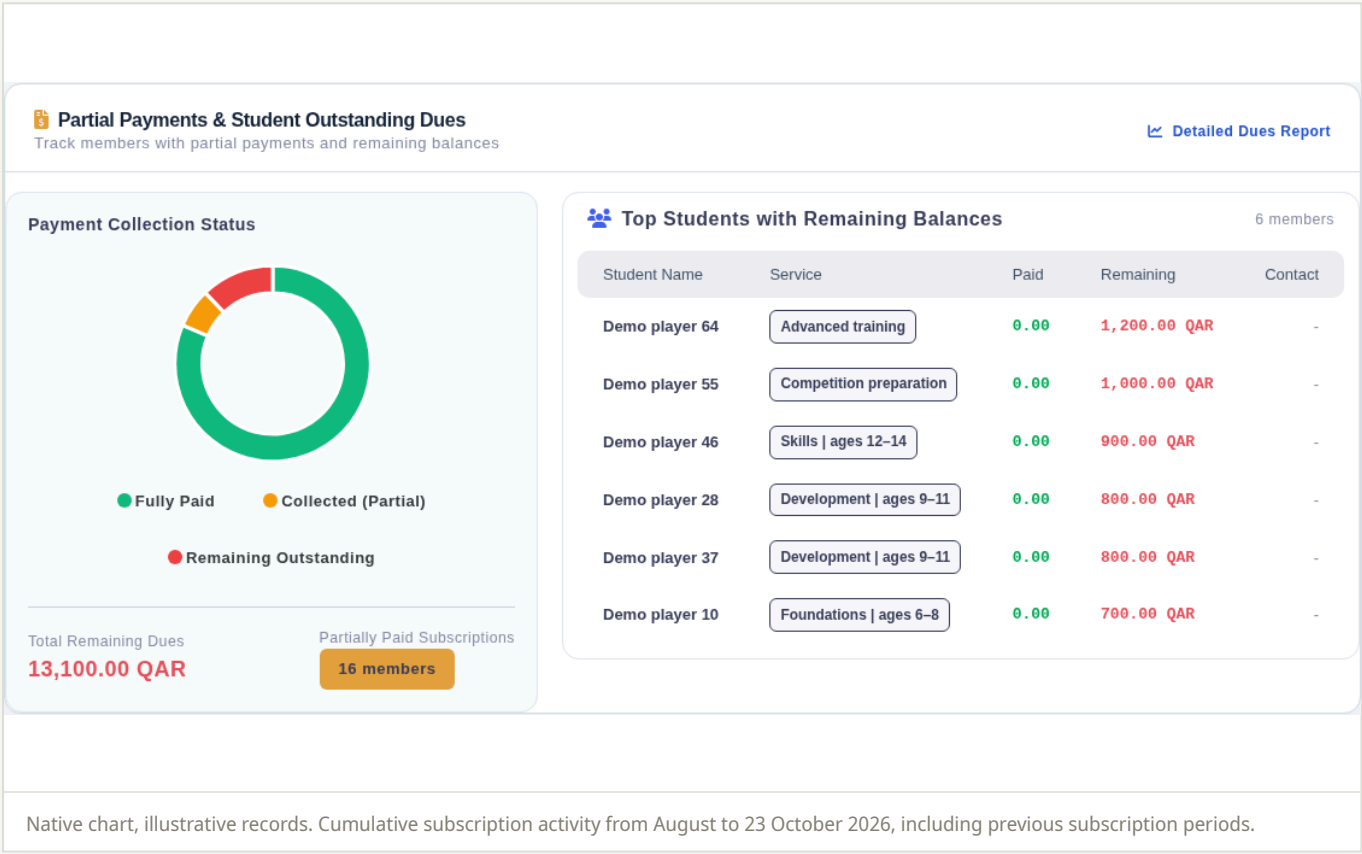

See outstanding balances early.

Subscriptions and collection / follow the payment record.

95,000
QAR collected cumulatively

13,100
QAR still outstanding

72
Active subscriptions

Native chart, illustrative records. Cumulative subscription activity from August to 23 October 2026, including previous subscription periods.

THE MANAGEMENT QUESTION

Who needs a documented payment follow-up?

The dashboard separates fully paid subscriptions, partial collection and remaining amounts. An outstanding balance is not cash received.

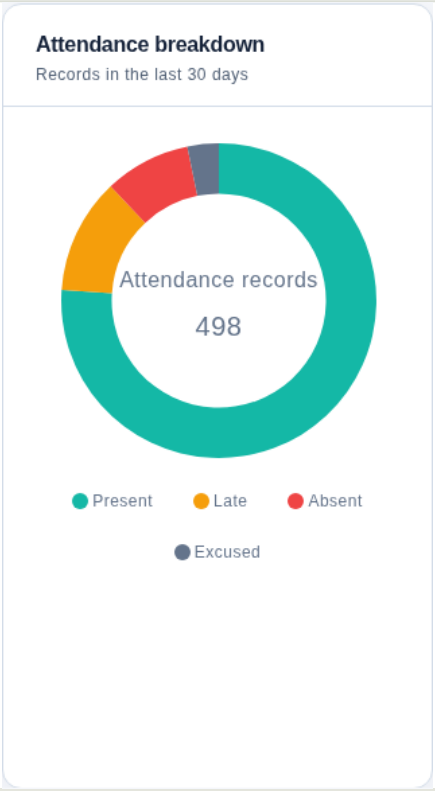

Next action: Open the subscription and last payment reference before contacting the guardian.

HAGZZ / ACADEMY GUIDE

Attendance is a follow-up signal.

Daily operations / understand the session record.

88%	498	44
Attendance rate	Recorded session cases	Absent cases

Native chart. Last-30-day calculation; the added demonstration sessions run from 3 to 23 October 2026.

THE MANAGEMENT QUESTION

Which absences need a conversation?

There are 438 present or late cases out of 498 recorded cases, plus 44 absent and 16 excused. These are repeated session cases—not 498 different players.

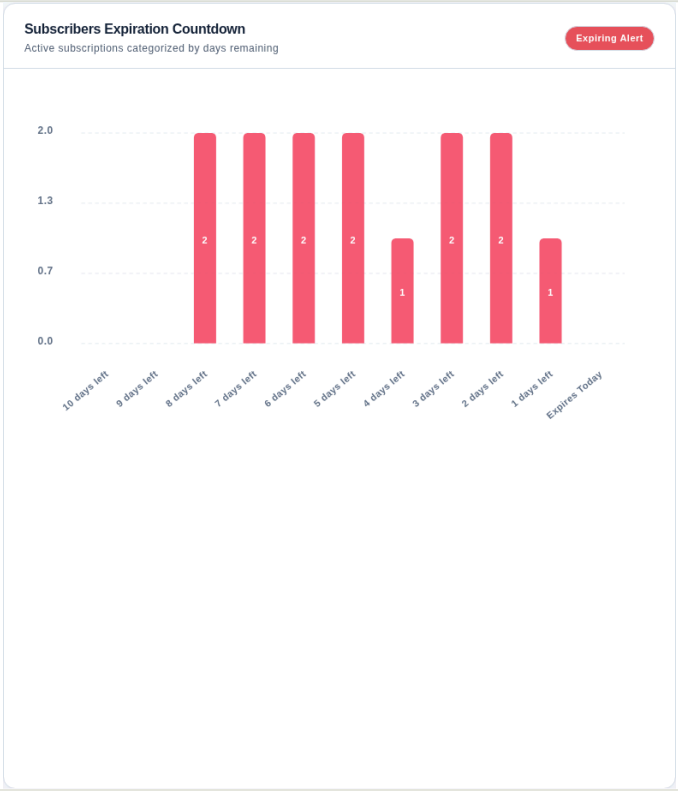

Next action: Review the player and group details with the coach, then agree on appropriate guardian follow-up.

HAGZZ / ACADEMY GUIDE

Renewal starts before expiry.

Retention workflow / prioritise the next conversation.

14	10	24–31
Subscriptions approaching expiry	Days in the forward view	October expiry dates in this example

Native chart, illustrative records. Forward-looking snapshot from 23 October 2026.

THE MANAGEMENT QUESTION

Which families should the team contact first?

The chart groups active subscriptions by days remaining. It shows upcoming expiry, not a renewal prediction or a completed renewal rate.

Next action: Start with the earliest dates and confirm the schedule, intent to continue and payment position.

HAGZZ / ACADEMY GUIDE

Where is the operating budget going?

Expense oversight / review the recorded categories.

28,100	14,100	5
QAR cumulative expenses	QAR October expenses	Recorded expense categories

Native chart, illustrative records. Cumulative categories from August through 23 October—not October alone.

THE MANAGEMENT QUESTION

Does the spending mix support operations?

Venue, coaching, equipment and communication costs appear as separate categories. Category totals reconcile to the recorded expense total.

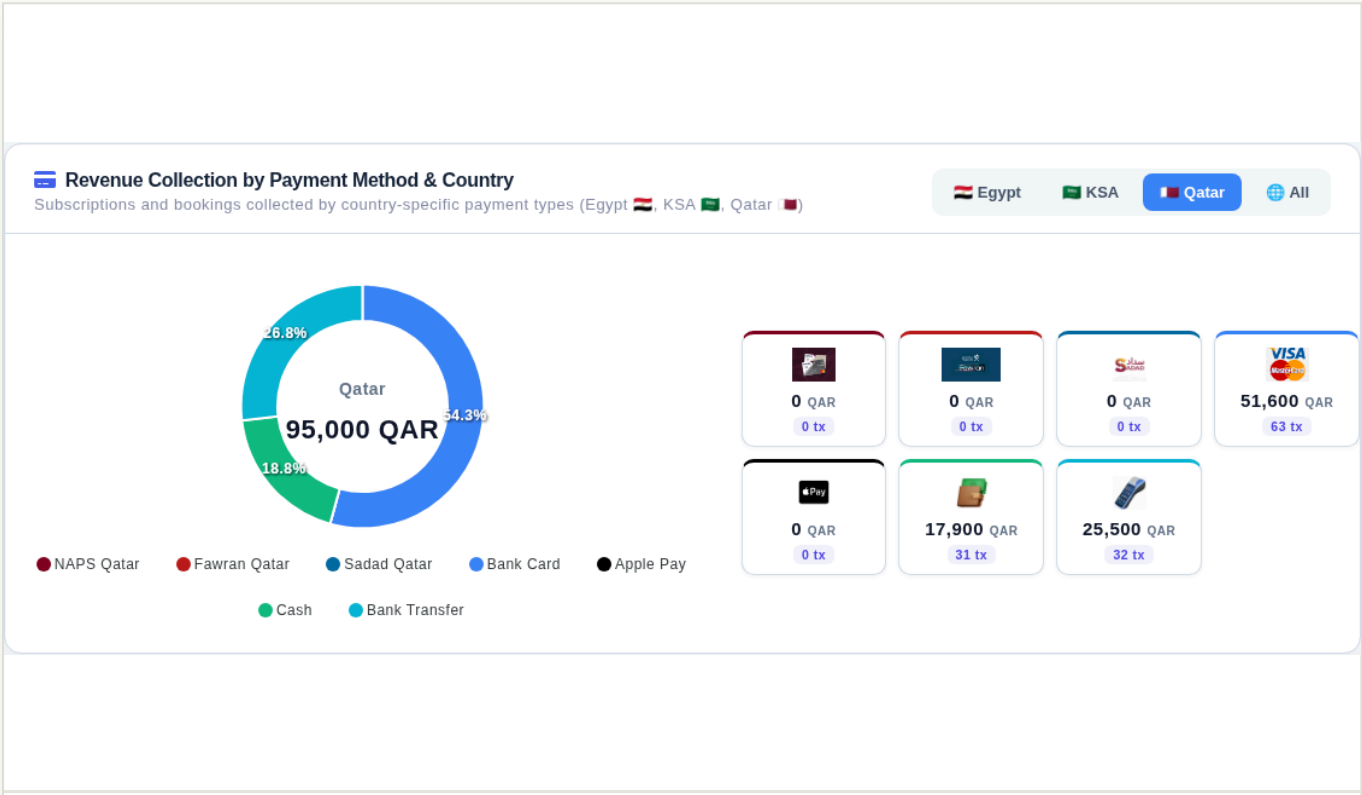

Next action: Review the largest category and its period. Distinguish paid expenses from commitments not yet settled.

HAGZZ / ACADEMY GUIDE

How does money reach the academy?

Collection oversight / Qatar payment-method view.

95,000	QATAR	4
QAR across recorded methods	Selected country view	Recorded methods in this example

Native chart, illustrative records. Cumulative figures. Showing a method does not mean a new payment gateway has been activated.

THE MANAGEMENT QUESTION

Do cash, cards and bank transfers reconcile?

Bank transfers are included in the Qatar view. The method total matches cumulative recorded collection: QAR 95,000. Some methods are grouped by the system.

Next action: Match each payment reference to its method before reconciling the accounts.

HAGZZ / ACADEMY GUIDE

Two apps. Distinct account journeys.

Give each user the right starting point.

Partner dashboard / web

The main workspace for academy setup, programmes, player records, subscriptions, attendance and collection.

Hagzz Partner / owner

The owner uses the dedicated management account and the features enabled for that account.

Hagzz Partner / guardian

A separate guardian account is activated with the academy. It does not share the owner's credentials.

Hagzz / customers

The customer app for discovering academies, choosing training and reviewing the available registration steps.

CHECK BEFORE YOU CONTINUE

A player record in the academy dashboard does not automatically create or link a customer-app account. Confirm the required account activation and player linking with the academy.

HAGZZ / ACADEMY GUIDE

Start with one complete operating journey.

A controlled first experience for your team.

01 Set up the academy

02 Register a player

03 Record collection

04 Run attendance

Prepare

Confirm identity, locations, coaches, programmes, prices, capacity and Qatar-local schedules.

Prove the workflow

Use a dedicated training account. Check one player, one group, one subscription and one attendance session.

Give access

Create separate staff accounts with the necessary branch and role permissions.

Invite families

Share the correct app link and activation instructions after the academy confirms the account journey.

CHECK BEFORE YOU CONTINUE

Do not use real payments solely to test a workflow. Validate the published app and your account's available features before inviting customers.

HAGZZ / ACADEMY GUIDE

The guardian has a separate account.

Hagzz Partner / a clear activation and follow-up journey.

01 Request activation

02 Use personal credentials

03 Verify the player

04 Review available details

Before first sign-in

Ask the academy to activate the guardian account with the correct contact details and player information.

After signing in

Confirm that the academy and player shown are correct. Report a missing link to registration staff.

When details differ

Use the subscription or receipt reference when asking about a schedule or balance. Do not create duplicate player records.

For a new training choice

Use the Hagzz customer app to discover training. Hagzz Partner is the separate follow-up journey.

CHECK BEFORE YOU CONTINUE

Use the features displayed for your account and version. Do not assume every management-dashboard feature is available to guardians.

HAGZZ / ACADEMY GUIDE

Choose training with the right information.

Hagzz customer app / discovery before commitment.

01 Find the academy

02 Choose the programme

03 Check the details

04 Confirm the available action

Verify the location

Check the academy, sport and branch in Qatar. Review the actual venue and the published training schedule.

Understand the offer

Review age, level, dates, package contents and price where provided. Ask the academy about missing details.

Read demonstration labels

Content marked demo or not bookable is illustrative. It is not a confirmed offer or a request for payment.

Keep the confirmation

Use booking or payment only when available for that programme. Keep the confirmation and transaction reference.

CHECK BEFORE YOU CONTINUE

A subscription entered manually by an academy is not guaranteed to appear automatically in the customer app.

HAGZZ / ACADEMY GUIDE

A readiness check, before the first invitation.

Agree on the operating basics once.

CHECK	WHAT TO CONFIRM
☐ Identity	Correct name, logo, location and contact details.
☐ Programme	Approved price, capacity, coach and schedule.
☐ Player	Correct guardian contact and group membership.
☐ Subscription	Correct dates, value and payment record.
☐ Attendance	One saved session with the correct player status.
☐ Team access	Individual accounts and appropriate permissions.
☐ Apps	Store installation, sign-in and the guardian journey.

CHECK BEFORE YOU CONTINUE

The owner or operations lead should complete a controlled end-to-end check before live use.

HAGZZ / ACADEMY GUIDE

Digital transformation. Open to every academy.

An initiative from Hagzz and Qatar Science & Technology Park.

Support for academies of every size.

Discounts and complimentary months supporting digital transformation in Qatar's sports sector, without distinction based on academy size.

Base prices are published on the Hagzz packages page. The approved academy offer confirms the discount, complimentary period and included scope.
